

I was disappointed to learn recently that there is consideration to change current policies that could prevent the K-LOVE radio network from broadcasting in my area. K-LOVE (88.9 FM locally) is the only radio station of its kind in the Central Oklahoma area. It would be a serious blow to the entire area for this station to stop airing K-LOVE for another station with a different format. K-LOVE is the only place to find a positive and encouraging message for everyday life on the radio. Not to mention the fact that listening to this station helps in the future purchasing of CDs. For myself personally, K-LOVE has become the only radio station that's worth listening to. The amount of negativity and reminders of how our society has sunk to new lows is a constant reminder on all but few other stations. Thousands of people rely on K-LOVE for their daily dose of inspiration, so please carefully consider the change to prioritize LPFM over current FM translator service, if doing so takes this vital radio content from those who can benefit from it.
